BATTERY SAFETY TIPS

MAKE SURE YOUR BATTERY WRAPS
HAVE **NO NICKS OR TEARS.**

ALWAYS CARRY SPARE BATTERIES IN
AN APPROVED CASE TO AVOID SHORTING
BY OTHER OBJECTS.

BATTERIES CAN BECOME **VOLATILE** WHEN
EXPOSED TO **EXTREME TEMPERATURES.**

2500 mAh 20A

KNOW YOUR BATTERY'S AMP RATINGS
AND LIMITS. IT IS NOT NECESSARILY WHAT
IS WRITTEN ON THE WRAP.

FOR MODS WITH **2 OR MORE BATTERIES**,
ALWAYS PAIR/MATCH/MARRY THEM.
DO NOT TAKE ONE BATTERY
FROM THE MARRIED SET AND
USE SEPARATELY IF YOU INTEND TO
USE THE MARRIED SET AGAIN,
THIS COULD MAKE THE CELL UNSTABLE.

DON'T CHARGE YOUR BATTERIES OVERNIGHT.
KEEP THEM IN A PLACE WHERE YOU CAN KEEP
AN EYE ON THEM.

**DO NOT LEAVE BATTERIES
IN YOUR CAR.**

BATTERIES DO NOT LAST FOREVER.
AT THE FIRST SIGN OF DECREASING
PERFORMANCE, **PLEASE GET A NEW BATTERY.**
